# OMRON

# Single-phase Overvoltage/Undervoltage Relay

# K8AK-VW

# Ideal for Voltage Monitoring for Industrial Facilities and Equipment.

- Monitor for overvoltages and undervoltages simultaneously. Separate settings and outputs supported for overvoltages and undervoltages.
- Manual resetting and automatically resetting supported by one Relay.
- Pre-alarm Monitoring Mode.
- Two SPDT output relays, 5 A at 250 VAC (resistive load).
- Process control signal (0 to 10 V) and current splitter input supported.
- Output status can be monitored using LED indicator.
- Input frequency of 40 to 500 Hz supported.
- Inputs are isolated from the power supply.
- Refer to Safety Precautions on page 9.
- Refer to page 8 for commonly asked questions.

# **Ordering Information**

#### List of Models

Setting range	Power supply voltage	Model
1 to 10 V AC/DC 3 to 30 V AC/DC 15 to 150 V AC/DC	24 VAC/DC	K8AK-VW2 24 VAC/DC
	100 to 240 VAC	K8AK-VW2 100-240 VAC
20 to 200 V AC/DC 30 to 300 V AC/DC 60 to 600 V AC/DC	24 VAC/DC	K8AK-VW3 24 VAC/DC
	100 to 240 VAC	K8AK-VW3 100-240 VAC

# **Ratings and Specifications**

## **Input Range**

Model	Range*	Connection terminal	Setting range	Input impedance	Overload capacity
	0 to 10 V AC/DC	V1-COM	1 to 10 V AC/DC	Approx. 120 kΩ	
K8AK-VW2	0 to 30 V AC/DC	V2-COM	3 to 30 V AC/DC	Approx. 320 kΩ	
	0 to 150 V AC/DC	V3-COM	15 to 150 V AC/DC	Approx. 1.6 MΩ	Continuous input at 115% of maximum input.
	0 to 200 V AC/DC	V1-COM	20 to 200 V AC/DC	Approx. 1.2 MΩ	10 s at 125%
K8AK-VW3	0 to 300 V AC/DC	V2-COM	30 to 300 V AC/DC	Approx. 1.7 $M\Omega$	(up to 600 VAC)
	0 to 600 V AC/DC	V3-COM	60 to 600 V AC/DC	Approx. 3.1 $M\Omega$	

\* The range is selected using connected terminals.

For the most recent information on models that have been certified for safety standards, refer to your OMRON website.

## K8AK-VW

#### Ratings

Power supply	Isolated power supply	24 VAC/DC		
voltage	isolated power supply	100 to 240 VAC		
Power consumption       24 VAC/DC: 2.0 VA/1.1 W max. 100 to 240 VAC: 4.6 VA max.         Operating value setting range (AL1 and AL2)       10% to 100% of the maximum value of the setting range K8AK-VW2: 1 to 10 V AC/DC 3 to 30 V AC/DC         Operating value setting range (AL1 and AL2)       10% to 100% of the maximum value of the setting range K8AK-VW3: 20 to 200 V AC/DC         K8AK-VW3: 20 to 200 V AC/DC       30 to 300 V AC/DC         60 to 600 V AC/DC       60 to 600 V AC/DC		24 VAC/DC: 2.0 VA/1.1 W max. 100 to 240 VAC: 4.6 VA max.		
		K8AK-VW2: 1 to 10 V AC/DC 3 to 30 V AC/DC 15 to 150 V AC/DC K8AK-VW3: 20 to 200 V AC/DC 30 to 300 V AC/DC		
Operating value	9	100% operation at set value		
Reset value		5% of operating value (fixed)		
Reset method		Manual reset/automatic reset (switchable) Note: Manual reset: Turn OFF power supply for 1 s or longer.		
Operating time	setting range (T)	0.1 to 30 s		
Power ON lock	time (LOCK)	1 s or 5 s (Switched using DIP switch.)		
Indicators		Power (PWR): Green, Relay output (RY): Yellow, Alarm outputs (AL1, AL2): Red		
Input impedanc	e	Refer to Input Range on previous page.		
Output relays		Two SPDT relays (NC operation)		
Output relay ratings		Resistive load 5 A at 250 VAC 5 A at 30 VDC Maximum switching capacity: 1,250 VA, 150 W Minimum load: 5 VDC, 10 mA (reference values) Mechanical life: 10 million operations min. Electrical life: 5 A at 250 VAC or 30 VDC: 50,000 operations 3 A at 250 VAC or 30 VDC: 100,000 operations		
Ambient operat	ting temperature	-20 to 60°C (with no condensation or icing)		
Storage temper	rature	-25 to 65°C (with no condensation or icing)		
Ambient operat	ting humidity	25% to 85% (with no condensation)		
Storage humidi	ity	25% to 85% (with no condensation)		
Altitude		2,000 m max.		
Terminal screw	r tightening torque	0.49 to 0.59 N·m		
Terminal wiring method		Recommended wire Solid wire: 2.5 mm <sup>2</sup> Twisted wires: AWG16, AWG18 Note: 1. Ferrules with insulating sleeves must be used with twisted wires. 2. Two wires can be twisted together. Recommended ferrules Al 1,5-8BK (for AWG16) manufactured by Phoenix Contact Al 1-8RD (for AWG18) manufactured by Phoenix Contact Al 0,75-8GY (for AWG18) manufactured by Phoenix Contact		
Case color		N1.5		
Case material		PC and ABS, UL 94 V-0		
Weight		Approx. 150 g		
Mounting Mounts to DIN		Mounts to DIN Track.		
Dimensions		$22.5 \times 90 \times 100 \text{ mm} (W \times H \times D)$		

## Specifications

Allowable operati	ng voltage range	85% to 110% of rated power supply voltage			
Allowable operating frequency range		50/60 Hz ±5 Hz			
Input frequency range		40 to 500 Hz			
Overload capacity Continuous input		Continuous input at 115% of maximum input, 10 s at 125% (up to 600 VAC).			
Repeat error Operating value		$\pm$ 0.5% full scale (at 25°C and an ambient humidity of 65% at the rated power supply voltage, DC and 50/60 Hz sine wave input)			
	Operating time	±50 ms (at 25°C and 65% humidity, rated power supply voltage)			
	Conforming standards	EN 60947-5-1 Installation environment (pollution level 2, installation category III)			
Applicable stan- dards	EMC	EN 60947-5-1			
uuuu	Safety standards	UL 508 (Recognition), Korean Radio Waves Act (Act 10564), CSA: C22.2 No.14, CCC: GB/T 14048.5			
Insulation resista	nce	20 $M\Omega$ min. Between all external terminals and the case Between all power supply terminals and all input terminals Between all power supply terminals and all output terminals Between all input terminals and all output terminals			
Dielectric strengt	h	2,000 VAC for 1 min Between all external terminals and the case Between all power supply terminals and all input terminals Between all power supply terminals and all output terminals Between all input terminals and all output terminals			
Noise immunity		1,500 V power supply terminal common/normal mode Square-wave noise of $\pm 1~\mu s/100$ ns pulse width with 1-ns rise time			
Vibration resistance		Frequency: 10 to 55 Hz, 0.35-mm single amplitude 10 sweeps of 5 min each in X,Y, and Z directions			
Shock resistance		100 m/s <sup>2</sup> , 3 times each in 6 directions along 3 axes			
Degree of protect	ion	Terminals: IP20			

# Connections

## **Terminal Diagram**

#### Note: 1. There is no polarity for the DC power supply input.

- 2. For the voltage input, you can input only from the C terminal and one other terminal.
- 3. Refer to Setting Ranges and Wiring Connections for information on the V1, V2, and V3 voltage input terminals.
- 4. Use the recommended ferrules if you use twisted wires.

## Wiring Example

#### Timing Charts •Overvoltage and Undervoltage Operation Diagram

DIP switch settings: SW3 and SW4 both ON or both OFF.

- Note: 1. The K8AK-VW output relay is normally operative.
  2. The power ON lock prevents unnecessary alarms from being generated during the instable paried when the pair of the pair
  - being generated during the instable period when the power is first turned on. There is no relay output during timer operation.

#### •Overvoltage and Overvoltage Operation Diagram (Overvoltage Pre-alarm Mode)

DIP switch settings: SW3 ON and SW4 OFF.

Note: 1. The K8AK-VW output relay is normally operative.
2. The power ON lock prevents unnecessary alarms from being generated during the instable period when the power is first turned on. There is no relay output during timer operation.

## •Undervoltage and Undervoltage Operation Diagram (Undervoltage Pre-alarm Mode)

DIP switch settings: SW3 OFF and SW4 ON.

Note: 1. The K8AK-VW output relay is normally operative.
2. The power ON lock prevents unnecessary alarms from being generated during the instable period when the power is first turned on. There is no relay output during timer operation.

## Nomenclature

#### Indicators

Item	Meaning
Power indicator (PWR: Green)	Lit when power is being supplied.
Relay status indicator (RY: Yellow)	Lit when relay operates (Not light when both AL1 and AL2 are in error status) (Nor- mally lit)
Alarm indicators (AL1 and AL2: Red)	Lit when there is an overvoltage or under- voltage. The indicator flashes to indicate the error status after the input has exceeded the set value while the operating time is being clocked.

#### Setting Knobs

Item	Usage
Voltage knob (AL1)	Used to set the voltage to 10% to 100% of maximum setting range.
Voltage knob (AL2)	Used to set the voltage to 10% to 100% of maximum setting range.
Operating time knob (T)	Used to set the operating time to 0.1 to 30 s.

Note: 1. Use either a solid wire of 2.5 mm<sup>2</sup> maximum or a ferrule with insulating sleeve for the terminal connection. The length of the exposed current-carrying part inserted into

the terminal must be 8 mm or less to maintain dielectric strength after connection.

Recommended ferrules

- Phoenix Contact
- Al 1,5-8BK (for AWG16)
- AI 1-8RD (for AWG18)
- AI 0,75-8GY (for AWG18)

**2.** Screw tightening torque: 0.49 to 0.59 N  $\cdot$ m

## K8AK-VW

## **Operation Methods**

## **Setting Ranges and Wiring Connections**

Model	Setting range	Wiring connection
K8AK-VW2	1 to 10 V AC/DC	V1-COM
	3 to 30 V AC/DC	V2-COM
	15 to 150 V AC/DC	V3-COM
K8AK-VW3	20 to 200 V AC/DC	V1-COM
	30 to 300 V AC/DC	V2-COM
	60 to 600 V AC/DC	V3-COM

#### Connections

#### ●Input

Connect the input between terminals V1-COM, V2-COM, or V3-COM, depending on the input voltage.

Malfunctions may occur if the input is connected to unused terminals and the Unit will not operate correctly.

#### Power Supply

Connect the power supply to terminals A1 and A2.

#### Outputs

AL1 (SPDT relay) is output to terminals 11, 12, and 14. AL2 (SPDT relay) is output to terminals 21, 22, and 24. Note: Use the recommended ferrules if using twisted wires.

#### **DIP Switch Settings**

The power ON lock time, resetting method and operating mode are set using the DIP switch located on the bottom of the Unit.

#### •DIP Switch Functions

Pin	OFF ● ↑ ON O ↓		OFF 1	2	3	4
Power ON	1 s		•			
lock time	5 s		0			
Resetting	Manual reset			•		
method	Operating mode			0		
	AL1	AL2				
	Overvoltage	Undervoltage			•	•
Operating mode	Overvoltage	Overvoltage			О	•
modo	Undervoltage	Undervoltage			•	О
	Overvoltage	Undervoltage			О	О

Note: All pins are set to OFF at the factory.

## Setting Method

#### Setting Voltage

The voltage knob (AL1 and AL2) is used to set the voltage. The voltage can be set to 10% to 100% of the maximum setting range.

Turn the knob while there is an input to the input terminals until the alarm indicator flashes (when the set value and the input have reached the same level.)

Use this as a guide to set the voltage.

The maximum setting range will differ depending on the model and the input terminal.

Example: K8AK-VW3 Using Input Terminal V3-COM

The maximum setting range will be 600 VAC/VDC and the setting range will be 60 to 600 V.

#### •Operating Time

The operating time is set using the operating time knob (T). The operating time can be set to between 0.1 and 30 s. If the input exceeds (or drops lower than) the voltage set value, the alarm indicator will start flashing for the set period and then stay lit.

# **Safety Precautions**

#### Be sure to read the precautions for all models in the website at the following URL: http://www.ia.omron.com/.

#### Warning Indications

	Indicates a potentially hazardous situation which, if not avoided, will result in minor or moderate injury, or may result in serious injury or death. Additionally there may be significant property damage.
	Indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injury or in property damage.
Precautions for Safe Use	Supplementary comments on what to do or avoid doing, to use the product safely.
Precautions for Correct Use	Supplementary comments on what to do or avoid doing, to prevent failure to operate, malfunction, or undesirable effects on product performance.

#### Meaning of Product Safety Symbols

	Used to warn of the risk of electric shock under specific conditions.
$\bigcirc$	Used for general prohibitions for which there is no specific symbol.
	Used to indicate prohibition when there is a risk of minor injury from electrical shock or other source if the product is disassembled.
	Used for general mandatory action precautions for which there is no specified symbol.

Electrical shock may occasionally cause serious injury. Confirm that the input voltage is OFF before starting any wiring work and wire all connections correctly.

## 

Electrical shock may cause minor injury. Do not touch terminals while electricity is being supplied.

There is a risk of minor electrical shock, fire, or device failure. Do not allow any pieces of metal, conductors, or cutting chips that occur during the installation process to enter the product.

Explosions may cause minor injuries. Do not use the product in locations with inflammable or explosive gases.

There is a risk of minor electrical shock, fire, or device failure. Do not disassemble, modify, repair, or touch the inside of the product.

Loose screws may cause fires. Tighten terminal screws to the specified torque of 0.49 to 0.59 N-m.

Use of excessive torque may damage the terminal screws. Tighten terminal screws to the specified torque of 0.49 to 0.59  $N{\cdot}m.$ 

Use of the product beyond its life may result in contact welding or burning. Make sure to consider the actual operating conditions and use the product within its rated load and electrical life count. The life of the output relay varies significantly with the switching capacity and switching conditions.
